Autumn Term Recap

Merry Christmas from the whole Maths Hub Leadership and Management Team at EMW Maths Hub! We made it!

We have had a fantastic start to the year with 95% of our Work Groups had their first session.

We are very much looking forward to our next LLME meeting on the 26th of January.

We have already made a start to 2024/25 planning and are very pleased that the recruitment window for our PD programmes is now open! More info inside.

Planning for our case study visits to schools is well underway and we're incredibly excited to be partnering with 2 of our schools for this opportunity.

Opportunities still available for 2023/24

**Sign Up**

Post 16: New to Core Maths

The programme gives inexperienced Core Maths teachers the opportunity to work collaboratively with their peers, guided by an expert Cohort Lead, to develop the specialist knowledge they need to teach Core Maths effectively.

Post 16: Developing Core Maths

This project, developed and provided in partnership with the AMSP, will contribute to the wider national effort to support teachers and leaders to increase the growth in uptake and delivery of Core Maths in schools and colleges, and to establish Core Maths as a standard option for post-16 Level 3 students who are not taking A level Maths.

2023/24 Work Group Feedback

100%

of people surveyed say participating in a Work Group had a beneficial impact on their teaching of mathematics

100%

of people surveyed agreed that students in their class now have a more positive attitude towards learning maths

97%

of people surveyed have used resources from their Work Group in their classroom or during CPD

Primary Mastery Specialist

"I am currently in my first year training to be a Mastery Specialist. So far I have attended the first residential and some LLME events which again have been a great insight of what is to come. The residential was informative and great for sharing knowledge about teaching for mastery. The specialists who deliver the training are amazing and very helpful. I feel confident about the future and excited about what's to come."

Emma Turnbull, Primary Mastery Specialist

READ MORE

Secondary Mastery Specialist

"Having taught for over 15 years, I have found the Secondary Mastery Specialist programme built on what I already knew to be effective Maths teacher whilst sharpening my focus and improving my practice. I've particularly appreciated the opportunities for ongoing professional development with likeminded Maths specialists and being able to share what I've learnt with both my department and other schools in the local area".

James Thomas, Secondary Mastery Specialist
